Disclaimer

The information provided on this report document is only for general information and should not be used as a reason to invest. Solidity CheckUp Team will take no payment for manipulating the results of this audit. Solidity CheckUp Team does not guarantees that a project will not sell off team supply, or any other scam strategy.

Smart contracts are deployed and executed on the blockchain platform. The platform, its programming language, and other software related to the smart contract can have its vulnerabilities that can lead to hacks. The audit can't guarantee the explicit security of the audited project / smart contract.

Background

Solidity CheckUp was commissioned by RIXAV to perform an audit of smart contracts:

<https://bscscan.com/address/0x6E9eE2c5659519EF3C1Cf169Ee8067BeAe321B30#code>

The purpose of the audit was to achieve the following:

- Ensure that the smart contract functions as intended.
- Identify potential security issues with the smart contract.

The information in this report should be used to understand the risk exposure of the smart contract, and as a guide to improve the security posture of the smart contract by remediating the issues that were identified.

Contract Details

Token	Contract Details for 09.04.2022
Contract Name	RIXAV
Contract Address	0x6E9eE2c5659519EF3C1Cf169Ee8067BeAe321B30
Total Supply	1,000,000,000,000
Token Ticker	RIXAV
Decimals	18
Token Holders	5
Transections Count	8
Liquidity Fee	N/A
Tax Fee	N/A
Uniswap V2 Pair	0x0d9e135a586287fe038b45ce38311a3240488097

Token Details

Details

Buy Fees:	3
Sell Fees:	3
Max TX:	N/A
Max Sell:	N/A

Honeypot Risk

Ownership:	Owned
Blacklist:	Not Detected
Modify Max TX:	Detected
Modify Max Sell:	Not Detected
Disable Trading:	Not Detected

Rug Pull Risk

Liquidity:	Not Detected
Holders:	Not Detected

Token Analysis & Top10 Holders

Audit Overview

No.	Issue description	Checking Status
1	Compiler Errors / Warnings	Passed
2	Reentrancy and Cross-function	Passed
3	Front running	Passed
4	Timestamp dependence	Passed
5	Integer Overflow and Underflow	Passed
6	Reverted DoS	Passed
7	DoS with block gas limit	Passed
8	Methods execution permissions	Passed
9	Exchange rate impact	Passed
10	Malicious Event	Passed
11	Scoping and Declarations	Passed
12	Uninitialized storage pointers	Passed
13	Design Logic	Passed
14	Safe Zeppelin module	Passed

Audit Overview

Security Issue

0 High

1 Medium

3 Low

0 Critical

Owner Privileges

- Contract owner can't mint tokens after initial contract deploy.
- Contract owner can't disable trading.
- Contract owner can set / change buy & sell taxes.
- Contract owner can change tx amount .
- Contract owner can't transfer ownership.
- Contract owner can transfer ownership .
- Contract owner can exclude/ include an address from reward/fee.

Conclusion & Analysis

- Smart Contracts within the scope were manually reviewed and analyzed with static tools.
- Audit report overview contains all found security vulnerabilities and other issues in the reviewed code.
- Found no Critical issue during the first review.
- Liquidity pair contract security is not checked due to out of scope

Kindly check the disclaimer above and note, the audit makes no statements or warranties on business model, investment attractiveness or code sustainability. The report is provided for the only contract mentioned in the report and does not include any other potential contracts deployed by Owner.
